# ISO 10993-6:1994, Biological Evaluation Of Medical Devices -- Part 6: Tests For Local Effects After Implantation

## Synopsis

Specifies test methods for the assessment of the local effects of an implant material on living tissue, at both the macroscopic and microscopic level. The local effects are evaluated by a comparison of the tissue response caused by a test specimen to that caused by materials used in medical devices whose clinical acceptability has been established. The test methods for local effects after implantation are used to assess subchronic effects (short-term, up to 12 weeks), or chronic effects (long-term, longer than 12 weeks). This title may contain less than 24 pages of technical content.

## Book Information

Paperback: 24 pages

Publisher: Multiple. Distributed through American National Standards Institute (ANSI) (August 23, 2007)

Language: English

ASIN: B000Y2U572

Product Dimensions: 8.2 x 0.1 x 10.5 inches

Shipping Weight: 3.2 ounces (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #1,953,576 in Books (See Top 100 in Books) #22 in Books > Engineering & Transportation > Engineering > Reference > American National Standards Institute (ANSI) Publications
