# Managing Water And Agroecosystems For Food Security (Comprehensive Assessment Of Water Management In Agriculture Series)

## Synopsis

Water protection, food production and ecosystem health are worldwide issues. Changes in the global water cycle are affecting human wellbeing in many places, while widespread land and ecosystem degradation, driven by poor agricultural practices, is seriously limiting food production. Understanding the links between ecosystems, water, and food production is important to the health of all three, and sustainably managing these connections is becoming increasingly necessary. This book shows how sustainable ecosystems, especially agroecosystems, are essential for water management and food production.

## Book Information

Series: Comprehensive Assessment of Water Management in Agriculture Series

Hardcover: 192 pages

Publisher: CABI; 1 edition (September 23, 2013)

Language: English

ISBN-10: 1780640889

ISBN-13: 978-1780640884

Product Dimensions: 6.8 x 0.6 x 9.7 inches

Shipping Weight: 1.3 pounds (View shipping rates and policies)
