The Princeton Field Guide To Prehistoric Mammals (Princeton Field Guides)

Synopsis

After the mass extinction of the dinosaurs 65 million years ago, mammals became the dominant terrestrial life form on our planet. Roaming the earth were spectacular beasts such as saber-toothed cats, giant mastodons, immense ground sloths, and gigantic giraffe-like rhinoceroses. Here is the ultimate illustrated field guide to the lost world of these weird and wonderful prehistoric creatures. A woolly mammoth probably won't come thundering through your vegetable garden any time soon. But if one did, this would be the book to keep on your windowsill next to the binoculars. It covers all the main groups of fossil mammals, discussing taxonomy and evolutionary history, and providing concise accounts of the better-known genera and species as well as an up-to-date family tree for each group. No other book presents such a wealth of new information about these animals--what they looked like, how they behaved, and how they were interrelated. In addition, this unique guide is stunningly illustrated throughout with full-color reconstructions of these beasts--many never before depicted--along with photographs of amazing fossils from around the world. Provides an up-to-date guidebook to hundreds of extinct species, from saber-toothed cats to giant mammoths. Features a wealth of color illustrations, including new reconstructions of many animals never before depicted. Demonstrates evolution in action--such as how whales evolved from hoofed mammals and how giraffes evolved from creatures with short necks. Explains how mass extinctions and climate change affected mammals, including why some mammals grew so huge.

Book Information

Series: Princeton Field Guides

Hardcover: 240 pages

Publisher: Princeton University Press (November 29, 2016)

Language: English

ISBN-10: 0691156824

ISBN-13: 978-0691156828

Product Dimensions: 8.5 x 0.6 x 11 inches

Shipping Weight: 1.5 pounds (View shipping rates and policies)

Best Sellers Rank: #137,796 in Books (See Top 100 in Books) #5 in Books > Science & Math > Biological Sciences > Paleontology > Vertebrate #20 in Books > Science & Math > Biological Sciences > Animals > Dinosaurs #71 in Books > Science & Math > Reference
